SUMMARY

Senior Frontend Engineer with 8+ years of experience delivering scalable web applications across legal, insurance, e-commerce, and security domains. Specialized in React, Next.js, and TypeScript, with practical experience in accessibility improvements, SEO optimization, and performance tuning aligned with Core Web Vitals. Proven track record in frontend modernization initiatives and high test coverage standards (90%+), working within distributed Agile teams. Embrace AI-augmented development workflows for planning, implementation, and automated testing, and collaborate effectively with product and design teams using Figma to translate complex UI systems into maintainable code.

CORE STRENGHTS

- Development and maintenance of scalable, production-grade web applications.
- Legacy system migration (PHP → React / Next.js).
- Accessibility & WCAG compliance implementation.
- SEO optimization & Core Web Vitals performance improvements.
- Design System development with Storybook.
- High test coverage culture (Jest, React Testing Library).
- AI-assisted development for planning, test automation, and code quality optimization (Cursor, Cloud Code).
- Agile collaboration (Scrum & Kanban) in remote teams.

TECHNICAL SKILLS

Frontend: React 18, Next.js 14, TypeScript, JavaScript (ES6+).
AI: Cursor, Claude Code (Figma MCP), ChatGPT.
Styling: TailwindCSS, Styled-Components, SASS, Bootstrap.
Testing: Jest, React Testing Library.
State & Data: React Query.
Architecture: SOLID Principles, Clean Code, Design Systems (Storybook).
Performance: Core Web Vitals, SEO Optimization.
Tools: Git, GitLab, pnpm, npm.
Backend (Previous Experience): PHP, Symfony, CakePHP, REST APIs.

WORK EXPERIENCE

Senior Frontend Engineer — Company: Lottofy (Contractor)

Portugal (Remote) | 2025 – Ongoing

Contributed to a large-scale online lottery and gaming platform, working across a reusable React component library and a Next.js 14 consumer application to improve architecture, scalability, and long-term maintainability.

- Designed scalable, domain-driven modules within a shared React component library using bottom-up composition and provider-based configuration patterns to enforce consistency and reusability across product verticals.
- Introduced factory-driven rendering strategies and domain restructuring efforts, improving separation of concerns and reducing cross-feature coupling.
- Implemented business-critical flows including betting systems, subscription management, secure payment integrations, dynamic form factories, and multi-mode game containers.
- Contributed in the migration from legacy React Context patterns to Zustand, improving state performance and reducing architectural complexity.
- Contributed to a Clean Architecture and CQRS-aligned API layer with DTO-based services, centralized error handling, and clear server/client boundaries.
- Strengthened quality standards through unit testing and Cypress E2E coverage for financial flows, documenting high-risk areas such as payment processing.
- Designed a multi-agent system using Claude Code to automate code review, QA, and security audits.
- Defined rules, architecture, and workflows for AI-assisted development.
- Implemented feedback cycles with structured reports and a shared knowledge base.

Senior Frontend Engineer — Company: VML (Contractor)

Portugal (Remote) | 2024 – 2025

Enhanced accessibility and SEO for a large-scale e-commerce platform built with React, Next.js, and TypeScript, improving metadata handling and WCAG compliance.

- Enhanced accessibility compliance (WCAG) by implementing ARIA attributes, screen reader
- support, and keyboard navigation improvements across checkout flows.
- Reduced Cumulative Layout Shift (CLS) issues in product and search pages, improving Core
- Web Vitals performance.
- Optimized metadata handling, canonical tags, and schema markup to strengthen SEO and
- search visibility.
- Reduced redirect chains to improve navigation performance and load times.
- Maintained 90%+ unit test coverage across frontend utilities.

React Developer Company: BYND Limited (Contractor)

Portugal (Remote) | 2023 – 2024

Worked on the migration of a photography e-commerce platform from CakePHP to Next.js and React, modernizing the frontend architecture and improving scalability. Collaborated within a multidisciplinary Kanban team to deliver features supporting online shop customization, pricing, sales, and photo management.

- Rebuilt legacy PHP page logic into scalable React components with responsive design.
- Integrated secure data fetching layers with proper error handling and permissions
- management.
- Implemented QA identifiers to support end-to-end testing strategies.

React Developer Company: Webdox CLM

Portugal (Remote) | 2022 – 2023

Developed and maintained a Contract Lifecycle Management (CLM) platform using React and TypeScript, supporting the full lifecycle of commercial contracts from creation to storage.

- Developed key application features, including secure password handling, permission-based settings.
- Built reusable, rigorously tested design system components in Storybook.
- Implemented security-focused features including permission controls and document validation restrictions.
- Refactored legacy components to reduce technical debt and improve performance.

Full-Stack Developer Company: Initium Software

Venezuela | 2020 – 2022

Developed and maintained a web application for an insurance company using JavaScript, jQuery, and Symfony, enabling quoting and service information management.

- Developed a quote generation feature based on user input for an insurance platform.
- Built an informational section explaining insurance services and functionality.
- Created REST APIs to handle CRUD operations for various database records.

Full-Stack Developer Company: Technology 4 Solutions

USA (Remote) | 2018 – 2020

Contributed to the development and maintenance of a web application designed for monitoring, security, and registration of buses and students on a school route, using AngularJS and CakePHP.

PROJECTS

Shanelle Productions LLC shanelleproductions.com

USA (Remote) | 2022 - Ongoing (Technical Support)

- Developed an informative website with a responsive, interactive and multilanguage design.
- Hosting configuration and website deployment.

EDUCATION

Systems Engineer - Universidad Bicentenaria de Aragua (U.B.A) / 2011 - 2017

MAIN COURSES

- React PRO: Take your foundations to the next level // Udemy // September 2023
- S.O.L.I.D principles and Clean Code // Udemy // June 2022
- TypeScript: your complete guide and handbook // Udemy // March 2020
- JavaScript: ECMAScript 6 and all its details // Udemy // February 2020
